nshimiefaustinpeace@gmail.com | +250 791 894 346 | Kigali, Rwanda

PROFILE

Full-Stack JavaScript and TypeScript developer specializing in the MERN stack, with hands-on experience building real-time systems, SaaS platforms, and civic-tech tools. Currently deepening expertise through THE GYM Rwanda, one of Rwanda's most rigorous engineering programs.

EDUCATION

University of Rwanda | Kigali, Rwanda

Expected Graduation: October 2026

Bachelor of Information Technology • GPA: 3.2 / 4.0

Relevant Coursework: Data Structures & Algorithms, System Design, Operating Systems, Database Management Systems, Cryptography & Network Security.

SKILLS SUMMARY

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL, C#
- **Frontend:** React.js (Hooks, Context API, Redux), Next.js, Tailwind CSS, HTML5, CSS3, Flutter
- **Backend:** Node.js, Express.js, Django REST Framework, .NET
- **Databases & Tools:** MongoDB, PostgreSQL, MySQL, Docker, Git, GitHub, WebSockets, Figma

WORK EXPERIENCE

Freelance Software Developer | Ingoga Technologies

Oct 2025 – Dec 2025

- Built Ubuzima Digital System (UDS), a real-time hospital queue manager that shows each patient's live position on hospital TVs and their own phone, so they can leave, run errands, and return only when their turn is near.
- Eliminated the core problem of patients losing their queue spot when stepping away, freeing up waiting rooms and cutting wasted hours per visit using Node.js WebSocket architecture.

Software Developer Intern | Zaantu Ltd (Remote)

Feb 2025 – Aug 2025

- Delivered key features for "Appo-inventory-manager," enabling businesses to track stock in real time across iOS and Android, reducing inventory errors and saving hours of manual reconciliation.
- Built backend services in Golang and containerized the app with Docker, cutting deployment time and improving environment consistency across the team.

Ingazi Ambassador | Ministry of Youth and Art

Aug 2025 – Present

- Enrolled 1,000+ youth onto the Ingazi platform, directly connecting them to online courses and skills development opportunities.
- Guided 200+ youth through job applications, polishing CVs and running mock interviews, resulting in 54 confirmed job placements.

PROJECTS

Rosha AI (Compliance Assistant) | Flutter, Node.js, PostgreSQL, WhatsApp Bot API, NLP

- Leading software development of an AI-powered compliance assistant that translates RRA tax letters into Kinyarwanda and guides 170,000+ Rwandan SMEs through complex portal filing, targeting a 75% reduction in document interpretation time.
- Architecting Flutter frontend, Node.js REST APIs, PostgreSQL database, and a WhatsApp bot with browser extension that guides users through RRA portal filing step by step, at 1/10th the cost of a tax consultant.

Sanara (Health Passport) | Node.js, Express, MongoDB, Blockchain, React Native

- Building the Node.js backend and offline sync engine for a cross-platform health passport app giving every patient a QR-coded record accessible at any hospital, targeting 60% of African patients with no medical record continuity.
- Architecting Node.js services to handle patient data writes, blockchain ledger entries, and CRDT-based offline sync, ensuring records captured without internet connectivity reconcile correctly when connection is restored.

SaaS Portfolio Builder (Portfy) | React.js (Hooks/Context API), Django REST Framework, PostgreSQL, Docker

- Helped 21 professionals launch their own digital portfolios showcasing their skills and work, with zero coding knowledge required.
- Architected a decoupled system: DRF handles data models and REST APIs, React (Context API) manages global state, and Docker ensures consistent dev-to-prod deployments.

CERTIFICATES & AWARDS

Intensive Software Engineering Training | THE GYM Rwanda

Expected: Apr 2026

- Two years, rigorous, industry-grade full-stack engineering bootcamp and one of Rwanda's most selective tech training programs.

2nd Place | Hello Tractor E-commerce Hackathon

- Built a full-stack agricultural e-commerce platform in 48 hours using React.js, Node.js, and MongoDB, connecting smallholder farmers with tractor hire services across Rwanda.

Web Development Certificate | Afretech (CMU-UR Partnership)

English Proficiency Certificate with CEFR level C1 | RDB / EF Education
